

SP+ INFRA Lux Fund¹

Investment Objective

SP+ INFRA aims to deliver strong total returns, with a focus on capital appreciation and, to a lesser extent, generate current income. It seeks to achieve this by providing a diversified, equity-focused portfolio of high-quality core plus and value add infrastructure assets across the energy, transport, digital, and social sectors. Stonepeak's global platform provides SP+ INFRA with an unparalleled opportunity, in our view, to build this portfolio through access to Stonepeak investment opportunities, talent and scale.

Firm Update⁴

Earlier this year, the U.S. government's tariff announcement caused significant volatility in global equity markets, with the S&P 500 down ~12% within just a few days in April. Since then, we have witnessed a rebound, in spite of sustained global geopolitical uncertainty, with the index up ~25% from trough levels. We believe that this rebound has been driven by delays in tariff implementation, continued enthusiasm in artificial intelligence and a surge in projected European defense spend. At Stonepeak we continue to closely monitor the macro economy and have found that elevated volatility can create pockets of dislocation that present attractive opportunities to invest across the entirety of a company's capital structure. Indeed, through the first half of the year, the Firm has capitalized on the current market conditions by signing 10+ investments across each of our target sectors.

SP+ INFRA Update⁴

Since inception in May 2025, SP+ INFRA has raised a total of \$438.1 million globally with a transactional NAV of \$479.1 million as of 30 June, 2025.⁸ Currently, SP+ INFRA holds 15 investments² across three of our target sectors – Digital Infrastructure 52%, Energy/Energy transition 10%, and Social Infrastructure 38%.³

SP+ INFRA has added several new investments over the last month with a few highlighted below.

Cologix is a leading Northern American network-neutral interconnection and hyperscale edge data center company. Recently, Cologix has commenced work on a \$1 billion data center complex in central Ohio. The complex will ultimately be engineered to support AI demands of the region. This new complex is reflective of Cologix's positioning in central Ohio digital infrastructure growth, in a region that now hosts 100+ data centers operated by Amazon, Google, Meta, and Microsoft, amongst others.

Digital Edge is a pan-Asia data center platform, with a unique focus on interconnection and hyperscale edge deployments. With an established presence in Japan, South Korea, Indonesia, Philippines, India and China, the company continues to expand its regional footprint. Most recently, Digital Edge secured a \$582 million green loan to fund the second phase of its flagship campus in Seoul, South Korea. Construction commenced in 2025, and the facility is expected to be ready for service in 2027.

Synera Renewable Energy ("SRE"), an asset held by SP+ INFRA as part of the GRF I portfolio, is a leading developer, builder and operator of offshore wind farms across Asia Pacific. SRE has recently appointed a new CEO, Yep Min Teo, who possesses 25 years of experience in the energy industry, and most recently as Senior Vice President of Grid Automation at Hitachi Energy. In addition, SRE has continued to progress on the development of Formosa 4 (a 495MW offshore wind farm project in Taiwanese waters), most recently awarding contracts to key suppliers to reinforce the integration of the APAC focused supply chain.

1) Stonepeak-Plus Infrastructure Sub-Fund, a sub-fund of Stonepeak-Plus Infrastructure Fund S.A. SICAV – UCI Part II (the “SP+ INFRA Lux Fund” and together with Stonepeak-Plus Infrastructure Fund LP and Stonepeak-Plus Infrastructure Fund (TE) LP (collectively and each, the “SP+ INFRA U.S. Fund”), “SP+ INFRA”).

2) Number of investments includes underlying assets held through SP+ INFRA's investment in GRF I.

3) Percentages reflect the fair market value of investments made within a particular sector or geography out of the aggregate fair market value of all SP+ INFRA investments. SP + INFRA is in earlier stages of deployment and the current portfolio does not reflect the true diversification that the fully deployed portfolio is expected to reflect. Diversification does not assure profit or protect against market loss. All investments involve risk, including loss of principal. Past or projected performance are not reliable indicators of future performance, and no guarantee or assurance is given that performance objectives will be achieved. Actual results may differ materially from the past or projected performance presented herein. All investments involve risk, including the loss of principal.

4) Key update presented herein is with respect to certain investments of Stonepeak and/or SP+ INFRA which were selected for illustrative purposes only. A full list of investments of SP+ INFRA is available upon request. Such select investments are not necessarily indicative of all or any investments that have been made or may be made by Stonepeak and were not selected on the basis of any performance-based criteria. Past performance is not indicative of future results, and there can be no assurance that Stonepeak will be able to implement its investment objectives or avoid substantial losses.

5) Stonepeak's assets under management (“AUM”) calculation provided herein is determined by taking into account (i) unfunded capital commitments of Stonepeak funds and any other vehicles or accounts managed by Stonepeak as of 31 December, 2024, (ii) the gross asset value of such funds, vehicles and accounts, plus any feeder fund level cash with respect thereto as of 31 December, 2024, and (iii) capital commitments of certain of such funds and such other vehicles or accounts managed by Stonepeak accepted between 1 January, 2025 and 31 March, 2025. The AUM figure (i) also includes assets managed in vehicles controlled and owned by Stonepeak, (ii) differs from the amount of assets under management reported for regulatory purposes and is based on gross asset values that are estimated and unaudited, and (iii) reflects the applicable FX rate as of 31 December, 2024 for any funds, vehicles, and accounts for which the underlying currency denomination is not USD.

6) As of July 1, 2025.

7) As of July 1, 2025. “Investments” includes those that are signed, pending close. There can be no assurance that such investments will close, or if they close, on the terms currently contemplated.

8) Past or projected performance is not necessarily indicative of future results, and there can be no assurance that this investment or any fund, vehicle, or account sponsored by Stonepeak will achieve comparable results, achieve its investment objectives, or avoid substantial losses. Net returns shown reflect the percent change in the transactional NAV per share from the beginning of the applicable period, plus – except with respect to shares in Class I-1D, Class S-1D, and any other distributing share class – amounts that would otherwise have been distributed that are reinvested in accordance with the SP+ INFRA Lux Fund's governing documents. Reconciliation to GAAP NAV and the calculation of transactional NAV are available upon request. As used herein, “transactional NAV” refers to the price at which shares are bought and sold. Past performance of each share class is shown from the share class inception date. Where less than 12 months of performance data is available for each share class, that performance data shall be considered supplemental to the overall performance of SP+ INFRA.

9) The annualized inception to date net return is marked as not meaningful (“NM”) due to the recent inception of the share class.

10) The information provided herein is presented as an illustrative summary of select key terms for discussion purposes only. This summary is intended to facilitate discussions only and is not legally binding or enforceable in any respect. The terms and other information contained herein do not purport to be complete and are subject to change at any time without notice. The Prospectus for the SP+ INFRA Lux Fund sets out a complete breakdown of all costs that the Fund may bear during its term and the frequency (if applicable) by which such costs will arise. Any information regarding costs provided in this fact sheet does not purport to be comprehensive. An investment in the SP+ INFRA Lux Fund involves subscribing to shares of a collective investment and not of a given underlying asset. The SP+ INFRA Lux Fund will be actively managed without reference to a benchmark.

11) The aggregate NAV of total redemptions on an aggregate basis across SP+ INFRA is generally limited to 5% at the applicable Redemption Date; provided that the Board may, having regard to the AIFM's analysis of the SP+ INFRA Lux Fund's available liquidity and with the consent of the Portfolio Manager, elect to increase the Redemption Amount in respect of any particular Redemption Date. The Board may, but is not obligated to, suspend the determination of NAV and/or the SP+ INFRA Lux Fund's offering and/or redemptions where circumstances so require and provided the suspension is justified having regard to the interests of Shareholders. For the avoidance of doubt, the redemptions program shall only be suspended in exceptional circumstances and not on a systematic basis. An investor should therefore consider an investment in the SP+ INFRA Lux Fund to be of limited liquidity. Investing in the SP+ INFRA Lux Fund is speculative and involves a high degree of risk, including the risks associated with leverage and the risk of a substantial loss of investment. The purchase and repurchase price for shares will be based on the NAV of each share class and will not be based on any public trading market. Because valuation of our assets involves subjective assumptions, our NAV may not accurately reflect the actual price at which our assets could be liquidated on any given day. It also may be difficult to reflect fully and accurately rapidly changing market conditions or material events that may impact the value of our assets between valuations, or to obtain complete information regarding any such events in a timely manner. As a result, our NAV may not reflect a material event until such time as sufficient information is available and the impact of such an event on an asset's valuation is evaluated in accordance with our valuation policies.

Legal Information - Summary of Principal Risks

Potential investors should be aware that an investment in the Fund involves a high degree of risk. Prospective investors should conduct their own due diligence on the Shares of the Fund. An investment in the Fund involves subscribing to Shares of the Fund and not of a given underlying asset. An investment in the Fund should only be considered by persons who can afford a loss of their entire investment. Prospective investors should read and carefully consider the detailed description of risk factors and potential conflicts of interest set out in the Fund's Prospectus before any investment decision is made. Potential Investors are also urged to conduct their own due diligence on the interests in the Fund and consult with their own financial, tax and legal advisors about the implications of investing in the Fund.

Under the packaged retail and insurance-based investment products (PRIIPs) regulation, the Fund is classified as 6 out of 7, which is the second-highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very likely to impact the capacity of the Fund to pay you. Be aware of currency risk. You may receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the summary risk indicator. The summary risk indicator does not include all risks inherent in the Shares and therefore it does not represent the total risk to the investor. The Company may invest in assets which have valuation and performance uncertainties and liquidity risk. The Prospectus gives more detail on the risks investors should consider. This investment involves a high degree of risk and should only be made if an investor can afford the loss of its entire investment. There are no guarantees or assurances regarding the achievement of investment objectives or performance. The Fund does not include any protection from future market performance, so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment. The whole amount of your invested capital in the Fund is at risk and there can be no guarantee that you will get back any or all of the amount invested on a redemption or transfer of Shares in the Fund.

Shares in the Fund have not been registered under the securities laws of any jurisdiction, and, therefore, cannot be sold unless they are subsequently registered under applicable securities laws or an exemption from registration is available. There is no public market for Shares in the Fund and one is not expected to develop. An investor will generally not be permitted to assign, sell, exchange, or transfer its Shares in the Fund except in accordance with the Prospectus.

There can be no assurance that SP+ INFRA will be able to successfully implement its investment strategy, generate expected returns or avoid substantial losses.

SP+ INFRA is a "blind pool" fund and thus you will not have the opportunity to evaluate future investments before such investments are made.

Stonepeak does not intend to list the units of SP+ INFRA on any securities exchange, and does not expect a secondary market in the units to develop. In addition, there are limits on the ownership and transferability of the units. Further, the valuation of SP+ INFRA's investments will be difficult, may be based on imperfect information and is subject to inherent uncertainties, and the resulting values may differ from values that would have been determined had a ready market existed for such investments, from values placed on such investments by other investors and from prices at which such investments may ultimately be sold.

An investment in SP+ INFRA is not suitable for you if you need ready access to the money you invest.

The purchase and repurchase price for shares of SP+ INFRA will be based on its NAV and are not based on any public trading market. While there will be independent valuations of SP+ INFRA's direct investments from time to time, the valuation of private equity investments is inherently subjective and its NAV may not accurately reflect the actual price at which its investments could be liquidated on any given day.

The acquisition of investments may be financed in substantial part by borrowing, which increases SP+ INFRA's exposure to loss. The use of leverage involves a high degree of financial risk and will increase the exposure of the investments to adverse economic factors.

The private equity industry generally, and SP+ INFRA's investment activities in particular, are affected by general economic and market conditions, such as interest rates, availability and spreads of credit, credit defaults, inflation rates, economic uncertainty, changes in tax, currency control and other applicable laws and regulations, trade barriers, technological developments and national and international political, environmental and socioeconomic circumstances. Identifying, closing and realizing attractive private equity investments that fall within SP+ INFRA's investment mandate is highly competitive and involves a high degree of uncertainty.

SP+ INFRA's investments will focus on the infrastructure and real asset industries and may be concentrated at any time in a limited number of geographies or investments, and, as a consequence, may be more substantially affected by the unfavorable performance of even a single investment as compared to a more diversified portfolio. In any event, diversification is not a guarantee of either a return or protection against loss in declining markets. There is no assurance that SP+ INFRA will perform well or even return capital; if certain investments perform unfavorably, SP+ INFRA would need at least one or a few of its investments to perform very well in order to achieve above-average returns. There is no assurance that this will be the case.

The above summary is not a complete list of the risks and other important disclosures involved in investing in SP+ INFRA and is subject to the more complete disclosures in such offering documents, which must be reviewed carefully prior to making an investment.
